Überprüfung von exportierten Workflows auf doppelte Einträge

Prüfung ob doppelte signoff_profile

Eine Zeile davon löschen

Mit Kai klären, ob noch zusätzlich

The screenshot shows an XML editor window titled 'Request_Second_Source.xml'. The XML content is a workflow template. Line 585 contains an `<AssociatedDataSet id="id237" dataSetRef="#id236" role="EPM_signoff_profile"></AssociatedDataSet>` entry. Line 586 contains another `<AssociatedDataSet id="id246" dataSetRef="#id236" role="EPM_signoff_profile"></AssociatedDataSet>` entry. Both entries reference the same `dataSetRef="#id236"` and have the same `role="EPM_signoff_profile"`. The editor interface includes a line number column on the left (582-606), a status bar at the bottom showing 'eXtensible Markup Language file', 'length: 92132 lines: 955', and a cursor position of 'Ln: 585 Col: 76 Sel: 19 | 1'. The status bar also indicates 'Unix (LF)', 'UTF-8', and 'INS'.
